Mihai-Mirel Apetrei

Phone number: +4915772110104

Email: mirel_apetrei@icloud.com

Address:

Achauer Straße 41,

78647 Trossingen - Germany

Education
z
⇒ *2019 - present: WellCode.ro - mentoring program.*

  ⇒   In this mentoring program, I developed problem-solving skills and solved over 150 algorithmic problems in C++/Java with the guidance of experienced mentors, they are ex-Google and ex-Facebook engineers, and learned about data structures, backtracking, and other programming skills.

  ⇒   I Studied Object-Oriented Programming in Java and worked on JavaScript and React for my personal portfolio projects.

Work Experience

2017 - present

  ⇒ machine operator on CNC machine, work that I've learned from scratch and where I saw in practice the difference between good code vs. bad code practice - there were moments when some defects from produced parts were because of bad code practice or an unsolved bug.

Projects

  ⇒ **Web-Shop (ECommerce platform):**
    o   The link to this project is: *https://web-shopping2021.herokuapp.com*
    o   *Github Link: https://github.com/Myrel1987/web-shop-PersonalProject*

The project is an E-Commerce platform, which has implemented a lot of nice features like:
  • *SignIn/SignUp(using Firebase)*,
  • *Payments(using Stripe API-test mode)*
  • *modern React code(styled-components, Redux …)*

- I like working on this because there are always parts of it to improve, even if it is functional, I want to keep up to date with new technologies and features that can improve performance and human life.

  ⇒ **Food Recipe App :**
  • *Github Link: https://github.com/Myrel1987/Recipe-app*

  • I used *React Hooks*
  • *Also connected with an external API Recipe, which renders recipes of chosen food*

Skill Highlights

  •   Fluent in Java, C++, Git, React
  •   React, Javascript, Firebase, MongoDB, Redux Stripe- experience with my personal project

Languages

English – working proficiency
German – elementary
Italian – second language
Romanian – native
